

AT A GLANCE - TECHNICAL INFO

All-Rounder LM-40

LM-40 truly is a versatile all-rounder combining five different products: corrosion protection, lubrication, rust solvent, cleaning agent and contact spray.

The field of application is extremely wide: seized up screws, rusted parts, squeaking doors, tight door locks, persistent stains, residual glue from stickers, stiff kickstands, tight screw nuts, locking mechanism of windows that need to be serviced, dirty wheel rims, filthy metal parts, corroded battery terminals, matt chrome parts of the vehicle, rough-running hydraulic systems, soiled tools, oil stains, persistent scale residues, connectors with contact problems and so on and so forth.

In every workshop, in every company and in every household this all-rounder has its place. LM-40 has a decent coco flavour and does not smell like petrol. So it can be applied everywhere.

LM-40 does not contain any silicone and is neutral against paint, metal, wood and plastic (exempt polycarbonate/PMMA).
