

## New Active Primer

The new primer is a black glass primer with additional features for glass bonding with polyurethane. Adhesion and UV protection remain the same as before.

### The product can be used for the following additional functions:

- Pre-treatment of RIM coatings (e.g. for Opel)
- Pre-treatment of paints
- Rust protection for smaller scratches in the paint
- Activation of PUR primers and remaining PUR beads

### This offers the following benefits to the customers:

- The customer only needs one product for all applications.
- The use of incorrect primers is made almost impossible, no danger of confusion
- Saving of costs

### The following products are replaced:

- Liquiprime 5061
  - Art. 6133 10ml stick
  - Art. 6134 100ml bottle
  - Art. 6160 30ml bottle
- Liquiwipe 4001 PU
  - Art. 6142 10ml stick
