INSTRUCTIONS

Preventive use

Add to diesel fuel according to the inspection intervals

Remedial use

Unclip the fuel pipe and immerse the end in the Diesel Flush. Close the fuel return pipe or feed that into the Diesel Flush. Start the engine and allow the engine to run at different speeds with the Diesel Flush unmixed. After the cleaning process, assemble the vehicle's system. In extreme cases, repeat the cleaning procedure if necessary.

As an alternative to remedial procedure, our Jet-Clean Unit can also be used for cleaning. To do this, pour 2-3 litres Diesel Flush into the Jet-Clean tank. Further instructions on use are given in the instructions for the Jet-Clean unit.
